

Right of Way Management

Water main infrastructure improvements and road work will require construction in the City owned road rights of way. The City has the ability to regulate the rights of way on City streets [City Code of Ordinances, Chapter 18 Article VII]. We are continually reviewing areas that may require removal of landscaping or structures to complete the infrastructure and road improvements. We are committed to communicating with property owners that will be impacted by this work.

Should you have questions regarding the city right of way near your property, please contact DPW Foreman, Jamie Spivy at (810) 656-7531.
