

September 4, 2019

The underground infrastructure work on Hickory Grove between Lahser and Woodward is scheduled to be completed this week, following with the road paving expected next week.

At this time, the road is anticipated to be paved on Tuesday, September 10th, dependent on weather. Access in and around the homes in the immediate area will be restricted throughout the day Tuesday while the asphalt is being laid.

We will continue to send email newsletters and update the website as the project progresses.

Thank you for your continued cooperation during this road project.
