Chesterfield / Lakewood Residents:

The contractor is working to complete the water main connections and pulverize Chesterfield Road.

Water main connections will continue for the infrastructure portion of this project on Chesterfield and Lakewood for the next few days. Residents may not see a lot of activity in the area while the water main is in the connection and testing phase, however work is progressing.

Oakland County Water Resources Commission will be notifying residents of any required water shut offs or precautionary boil water notices. The City will also send a email notification to inform affected residents.
